

Boost profits and productivity with **TheLeanSuite**

Our end-to-end Lean Manufacturing Software is built to help your business apply lean principles to get more savings and become efficient YOY without the stress of spending extra resources and money.

CORE MODULES

IDEA MANAGEMENT

Enable employees to submit ideas for improving manufacturing processes, and streamline the review and approval process to ensure the most impactful ideas are implemented quickly.

DAILY ISSUE MANAGEMENT

Easily identify, track, and manage anomalies, near misses, and quality issues in one central location with our Daily Issue Management system. Our built-in auto-assign rules streamline the process for faster closure, improving your overall efficiency.

KAIZEN AND PROJECT MANAGEMENT

Streamline project/Kaizen management by assigning the right team member based on their competency and workload, and empower engineers to collaborate and eliminate problems faster.

QUALITY PRIORITIZATION MATRIX

Compile quality losses and assign priority to each quality defect and use Machine Learning to categorize customer feedback into actionable data to focus on the most impactful quality projects.

COMPETENCY MANAGEMENT

Easily manage employee skills and training with our Competency Management System. Assess competencies, assign training, and track progress in one centralized platform to improve productivity and reduce errors.

LEARNING MANAGEMENT

Build, train, and track training for your workforce with our easy-to-use Learning Management System. Create and assign courses, manage certifications, and track completion to ensure your employees have the skills they need to excel in their roles.

JOB COVER MATRIX

Visualize team skills and operational readiness with our Job Cover Matrix. Easily map employee competencies to critical jobs, identify coverage gaps, and plan training strategically to ensure production continuity and enhance workforce flexibility.

LOSS AND COST MANAGEMENT

Transform raw production data into powerful financial insights. Our Loss and Cost Management system seamlessly captures operational data and visualizes your most significant losses in dollar terms, empowering you to optimize efficiency and make high-impact improvements.

KPI AND DASHBOARDS

Monitor the pulse of your operations in real-time. Visualize your most important metrics in one central hub to track progress against targets, identify trends, and empower your team to make faster, more informed decisions.

LEAN CREATOR

Digitize any workflow with our versatile document creation tool. Replace paper forms by building custom digital checklists, inspections, and audits to capture accurate data from the shop floor and gain real-time visibility into any process.
